

Write an algorithm to count number of even and odd nodes in sll

12 August 2020

23:29

```
Countnode(start)
    if start = null
        Print "error"
        Exit
        Exit
    End if
    Ec<-0
    Oc<-0
    Ptr<-start
    Repeat
        If data->ptr%2=0
            Ec<-Ec+1
        Else
            Oc<-oc+1
        End if
        Ptr<-link->ptr
        If ptr= null
            Exit
        End if
    End repeat
    Print Ec, Oc
End
```
